

# GivingWay Advanced Plan

Take your organization's fundraising to the next level!

## 01. Full Branding

Your brand is your organization's Identity Card. Maintain a consistent look across all your online assets so your supporters easily identify your brand wherever you engage with them. Apply your own logo and brand colors to all your GivingWay pages, including your campaign page, donation page, general organization page and website widget.

## 02. Embedded Donation Form & Widget

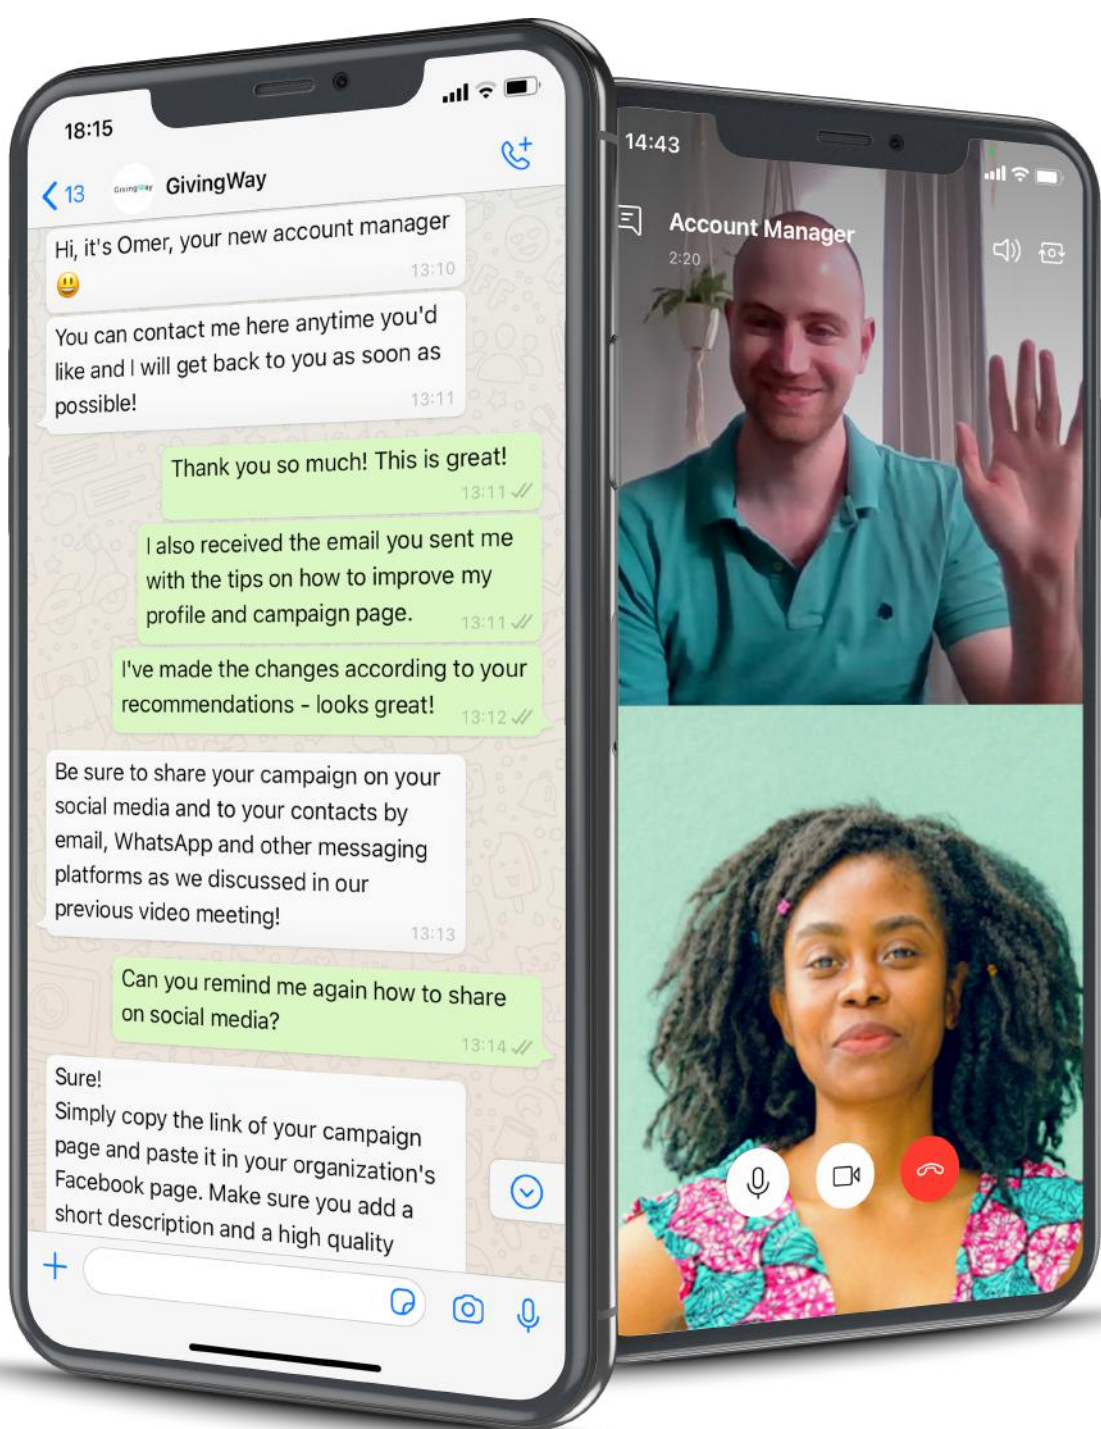

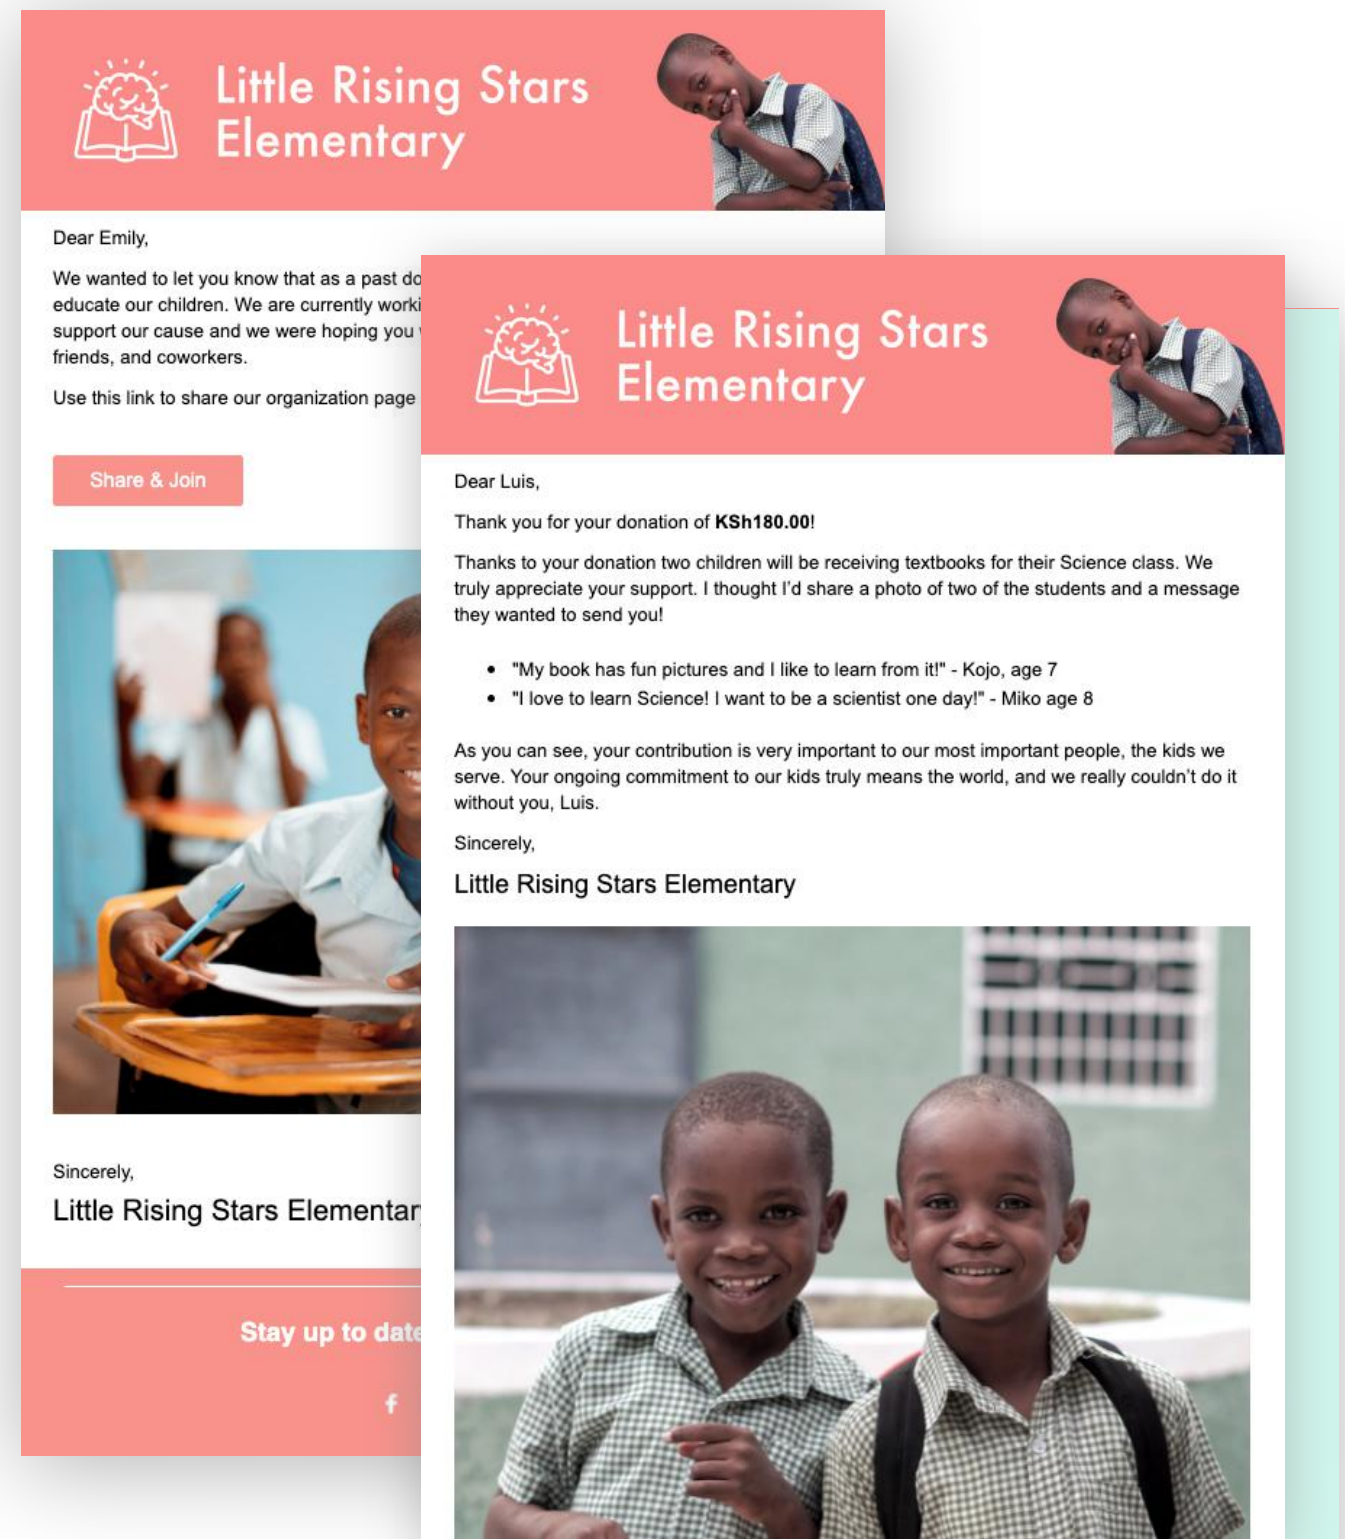

Your website is your organization's gate to the world and you should always aim to convert your website visitors into actual donors. With just a couple lines of code and simple integration you can add a beautiful donation button and form within your own website.

### 03.

## Personalized Emails

Personal engagement with your supporters is extremely important for building and maintaining relationships. Instead of sending a generic thank you email, you can now easily create branded and personalized e-mails to make your donors feel truly appreciated, engaged with your mission and inclined to donate again in the future.

### 04.

## Dedicated Account Manager & WhatsApp Support

Our account managers have years of experience when it comes to online fundraising. Your personal account manager will help you maximize your performance and support you along the way in your use of GivingWay's tools. With our new WhatsApp support, you'll now have a direct chat with your account manager and a response time of less than 24 hours!
